

The C. J. Nolte Company is very pleased to announce our agreement to represent Control Microsystems Inc. in the following states:
NY, NJ, DC, DE, MD and Eastern PA.

A View into Control Microsystems

Control Microsystems Inc. is a global supplier of Supervisory Control and Data Acquisition (SCADA) hardware and software products. Focused on telemetry, remote monitoring and control applications within utility sectors, Control Microsystems brings more than 30 years of experience to the market. Their dedication to providing customers with complete solutions and tailored support has only strengthened following the recent acquisition by Schneider Electric, the global specialist in energy management.

From Sensor to Enterprise

Control Microsystems builds products engineered to operate in harsh, unattended environments. Customers can expect progressive, flexible technology in reliable, robust packages. Their industry-leading product brands include the SCADAPack™ line of controllers and gas flow computers, Accutech™ wireless instruments, Trio™ long range data radios, and ClearSCADA™ enterprise software. The Sensor to Enterprise solution powers every part of a SCADA network and provides enhanced component integration to maximize system functionality and reduce operational costs.
